Education

University of Central Florida Expected May 2029
Bachelor of Science in Computer Science *Orlando, FL*
Relevant Coursework: Data Structures and Algorithms, Systems Software, Object Oriented Programming

Experience

Software Engineering Intern August 2026 – November 2026
Traackr *Remote*

- Deployed **2** staging environments via **Kubernetes**, **Terraform**, and **AWS**, speeding testing and releases **30%**
- Automated **50+** E2E API tests with **Playwright**, cutting testing time from **1 hr** to under **10 min**
- Standardizing API endpoint data storage in **Databricks**, covering **40%** of company data

Software Engineering Intern May 2026 – August 2026
Life Stages *Remote*

- Shipped an iOS wellness app to **500+** concurrent users by building features in **SwiftUI** and **Firebase**
- Raised user satisfaction **23%** by designing and integrating **3** responsive UI features
- Unblocked **3** developers by building a shared virtualized iOS dev environment

Full Stack Developer Feb 2025 – Apr 2025
Knight Hacks Project Launcher *Orlando, FL*

- Architected a full-stack social event app with a team of **6** using **React**, **Tauri**, and **MongoDB**
- Powered **5** core app features by designing **MongoDB** schemas and REST API endpoints for user and event data
- Cut feature delivery time by **50%** by building a shared data layer across **React**, **Tauri**, and **MongoDB**

Projects

Ghost Hands | *Python, Mediapipe, Express, React, Meta Quest 3S, neon*

- Developed a **Meta Quest** trainer on a **4**-person team that turns expert video into guided hand lessons
- Designed a **9**-endpoint REST API with **Express** and **Neon Postgres** at ∼**40 ms** median latency
- Raised video-to-lesson success from **0%** to **75%** by adding actionable errors to **100%** of failed uploads

Ifly | *Python, PyTorch, OpenCV, ZeroMQ, Raspberry Pi*

- Led a **4**-person team building a cyclist collision alert running a **166,700**-neuron fly brain at ∼**150 ms**
- Programmed a wearable **Raspberry Pi** streaming video via **ZeroMQ** and playing directional audio warnings
- Reduced false alarms from **5.3** to **0.8**/min by adding turn suppression, validated on **Waymo** driving data

ElderWatch | *React, Python, Snowflake*

- Won **Best Use of Snowflake** of **300+** teams at HackUSF 2026 by streaming **YOLOv8** detections live
- Engineered a **React** dashboard surfacing **20+** event types as live **Snowflake Cortex** AI insights
- Maintained **sub-3s** latency from capture through **CV inference** and **Snowflake**, enabling near-instant alerts

Flaming Notes | *React, TypeScript, Tailwind CSS, MongoDB, Go, Gemini AI*

- Developed a note-sharing platform on a **4**-person team that compiles notes into wiki pages via **Gemini AI**
- Implemented a **React**/**TypeScript** upload interface for **8** file types with a **Go** and **MongoDB** back end
- Built AI-generated quizzes of (**100+** questions) and note feedback for self-assessment and improving notes

PngPal | *Python, React, Electron, Flask, ElevenLabs AI*

- Built a desktop app with a team of **4** using **Electron** and **React**, embedding a system-wide AI finance chatbot
- Connected a frontend/backend **Python**/**Flask** server syncing **ElevenLabs** chatbot state and transcripts in real time
- Achieved **sub-5-second** end-to-end voice response time, from user speech input to audio playback

Technical Skills

Languages: C, JavaScript, TypeScript, HTML/CSS, Python, Java, Swift, SwiftUI
Frameworks: React, Express.js, Tailwind CSS, Next.js
Developer Tools: Git GitHub, MongoDB, Figma, AWS, Docker, Kubernetes, Terraform, Databricks, Playwright, OpenCV, Electrion, Tauri
